Dear Sir or Madam,

We are pleased that you are interested in our clinic. We offer you the full range of procedures in plastic, reconstructive, aesthetic, hand and burn surgery at the highest academic level.

At the BG Klinik, you will find specialists for all four pillars of the specialist field. Our medical team, our nursing team as well as our staff members in the secretariat and the patient registration office want to ensure the treatment success not only by using state-of-the-art medical equipment, but also by offering caring and devoted attention in daily patient care. A trusting relationship between the physician and the patients while closely involving the social environment, the attending general practitioners and specialists as well as the family is of utmost importance to us.

We will be happy to give you detailed advice on the pros and cons of plastic surgical procedures and discuss with you all your treatment options.

Kind regards,

Univ.-Prof. Dr. med Adrien Daigeler and his team

The Clinic for Hand, Plastic, Reconstructive and Burn Surgery takes care of patients with injuries and diseases in the whole of South Germany. The outstanding medical equipment and extensive expertise of our specialists is of great benefit not only to members of statutory accident insurance institutions after occupational accidents, but also to patients with statutory and private health insurance. The clinic has a capacity of about 50 beds. Every year, we provide advice and treatment to about 12,500 patients and perform 1,800 outpatient and 2,000 inpatient surgeries.

A specialty of our establishment is its function as a university hospital with the mission of teaching and research while also serving as a trauma hospital of the employers’ liability insurance association and a supra-regional trauma centre with the commitment of providing best possible acute care and rehabilitation services to patients following occupational accidents.

The clinic offers the full range of procedures in reconstructive surgery, with the aim of preserving the limbs following traumas or tumour surgeries or reconstructing the thoracic or abdominal wall. Patients with extensive bone and soft tissue defects following accidents, radiation therapy, tumour surgery or postoperative wound infections are treated using state-of-the-art and gentle autologous tissue grafting techniques to restore the body’s surface and function.

In addition to restoring health, our most important goal is to improve our patients’ quality of life.

A main focus of the clinic is the treatment of all injuries and diseases in the whole of Southern Germany. The advances in intensive care medicine and novel skin replacement techniques make it possible to also save and heal patients with severe burns.

In aesthetic surgery, all contouring and tightening procedures on the face, breast, abdomen and the extremities are performed on both an outpatient and inpatient basis, including special filler and botulinum toxin treatments as well as laser therapies.

We are always happy to be at your disposal, should you need a second opinion.

**Reconstructive surgery**

- Treatment of chronic wounds using special autologous tissue grafting techniques (at the Wound Centre)
- Reconstruction of the female breast following breast cancer in collaboration with the Gynaecology Department of University Hospital Tübingen
- Treatment of bone inflammations and soft tissue defects caused by injury in collaboration with the in-house Sections of Septic and Trauma Surgery
- Surgical removal of soft tissue tumours and restoration of form and function following tumour resection
- Surgical removal of skin tumours and aesthetic restoration of the skin surface
- Restoration of joint functions (tendon and muscle transfer and grafting) for paralysis (surgery for radial nerve palsy/peroneal nerve palsy/facial palsy)
- Brachial plexus surgery, including brachial plexus lesions due to birth trauma
- Reconstruction following nerve injuries including nerve grafting
- Reconstruction of the abdominal wall following abdominal hernia

**Hand surgery**

- Pressure relief for pinched nerves (nerve compression syndromes such as carpal tunnel and cubital tunnel syndrome)
- Various procedures for the treatment of nodular palmar fibromatosis (Dupuytren’s contracture)
- Treatment of inflammatory and irritative conditions of the tendon sheath (e.g. trigger finger)
- Treatment of degenerative changes in bones and joints, rheumatic diseases, e.g. finger joint replacement
- Complex wrist surgery, incl. corrective bone and joint surgery (e.g. following misalignment in healed bone fractures)
- Wrist arthroscopy (keyhole surgery)
- Surgical removal of hand tumours
- Correction of congenital hand deformities in children
- Treatment of hand injuries of any kind and degree of severity
- 24-hour replantation service for the treatment of amputation injuries
- Prosthetic fitting following amputation injuries

**Burn surgery**

- Treatment of burns, scalds and chemical injuries of any kind and degree of severity
- Centre for severe burns
- Scar revision, conservative scar treatment

**Aesthetic surgery**

- Breast augmentation and breast reduction, nipple correction
- Correction of gynaecomastia
- Eyelid surgery, face, forehead and neck lift
- Removal of skin blemishes
- Liposuction
- Tissue tightening following weight loss (abdominoplasty, arm, thigh and butt lift)
- Lipollifting (wrinkle treatment, lip augmentation, breast augmentation, contouring)
- Pinnaplasty and earlobe correction
- Botulinum toxin and filler treatment e.g. for wrinkles in the face or décolletage
- Medical needling for skin tightening and rejuvenation as well as scar revision and stretch marks
- Sex reassignment breast correction
- Intimate surgery
